Fernie Defeats Coleman In Hard Fought Game

Jim Anderson Scores for Coleman
Hughes and Sweeney Score
for Fernie

The last game in the Crow's Nest Pass league, in so far as Coleman is concerned, was played on the local ground Saturday evening when Fernie gathered in two points at the expense of the local club, winning by a score of 2-1.

The brand of play was much better than that of the last two previous occasions and was much appreciated by the fans present.

Both teams were on even terms during the first half and play was for the most part in mid field. On one occasion Fernie worked their way close to the Coleman net and McDonald saved brilliantly when Morris drove a hard shot from close in.

The second half had only gone two minutes when Jim Anderson worked the ball up the field, neatly beat a couple of men, and then let drive from well out to beat the goal keeper who had no chance to save. With Coleman one up Fernie began to speed up the game and it wasn't long before McDonald was being hard pressed to keep the ball out of the net. Eight minutes after Coleman's goal Fernie broke through and Hughes scored to put the teams on level terms once again. Fernie continued to force the game, and in this they were aided by several Coleman players who were holding on to the ball too long instead of beating one man and then passing it on to their team mate, with the result that Fernie players were taking the ball away from them on numerous occasions and sending it down to the Coleman goal. With two minutes to go and a tie game seemed inevitable, Jackson, who had been playing a good game all through, mis-judged the ball and Sweeney took this golden opportunity to flash the ball past McDonald for Fernie's second goal. Final score, Coleman 1 Fernie 2.

Coleman: McDonald, Jackson, J. Fraser, Kapka, Lloyd Brown, W. Anderson, W. Fraser, J. Anderson, Jack Anderson, Emmerson, Fernie: Oakley, Corrigan, Maio, Stewart, Robertson, Serek, Sweeney, Atherton, Morris, Hughes, Sewell.

Government Liquor Control Act of Alberta

Application for Beer Licence
PUBLIC NOTICE is hereby given that the undersigned intend applying to the Alberta Liquor Control Board for a licence to sell Beer by the glass or open bottle for consumption in conformity with the provisions of the Government Liquor Control Act of Alberta and the Regulations made thereunder with respect to the following premises:-

The westerly portion of the ground floor of the Coleman Hotel situated upon Lots 1 and 2, Block 11, Plan Coleman 8201.

Dated at COLEMAN the 7th day of August, A.D. 1934.

on Saturday, August 25th

Will be in Coleman at St.
Alban's Parish Hall on

Friday, August 31st

Social Credit Meeting

A meeting of the Coleman Social Credit study group was held on Monday evening Aug. 20 a goodly number of both sex being present. The meeting opened at 8 p. m., Mr. Knowles occupying the chair.

Mr. McLean of Bellevue addressed the meeting on the principles of Social Credit, pointing out the evils of our present, private control of money instead of State control, money being based on gold instead of real wealth, shortage of purchasing power in the hands of the consumer and explaining how Social Credit would remedy the same.

A large number of questions were asked the speaker, after which a general discussion took place on the working of Social Credit.

A hearty vote of thanks was accorded Mr. McLean. The meeting adjourned to meet again at 8 p. m. Monday, Aug. 27.

Daughter of J. J. Warren Fatally Injured in Car Accident

Much interest was taken by Coleman people in the automobile fatality which occurred in Calgary on Sunday morning. One person was fatally and several others seriously injured.

The dead woman, Mrs. Edith Warren Clemens, daughter of J. J. Warren, president of Trail Smelt Co., is also the sister of Mrs. H. V. Hummel, former resident of Coleman, who two years ago moved with her husband to take up residence in Calgary.

Wool Scouring Plant

Establishment of a wool scouring plant, valued at \$50,000, capable of handling the bulk of Alberta's annual wool clip, is now assured for the province, according to authoritative information available in Edmonton. Just where the plant will be located is not yet decided. Four locations are being considered by the eastern firm handling the proposition, namely Edmonton, Calgary, Lethbridge and Medicine Hat. One of the main considerations is proper railway facilities for both inward and outward shipments. The annual wool clip of the province runs between 3,500,000 and 4,000,000 lbs. The largest proportion is produced in Southern Alberta, but there are a number of important producing areas in the central and northern parts of the province. It is stated that the financial arrangements for the plant have been completed, and that installation can be commenced as soon as a definite location is arranged. The proposition is being closely studied by the provincial trade commissioner's office at Edmonton.

More Money for Highways

Completion of the Edmonton-Jasper Park Highway as an all-weather route, and the completion of the necessary reconstruction on the upper end of the Calgary-Banff Park highway, is largely assured as a result of arrangements made with the federal government by Hon. Geo. Hoadley for a vote totalling \$125,000 marked for the Jasper road and \$150,000 marked for the trans-Canada highway in Alberta. The latter provided for work both east and west of Calgary. In addition, the federal government has granted a vote of \$100,000 monthly to Alberta for direct relief, which is somewhat larger than had been expected.

Some of the work on the two park highways will be done this season, but some of the construction work necessary, chiefly that on Jasper road, will not be possible till next season.

Cattle Impounded

Strict adherence to the town by-law, prohibiting roaming of live stock within the town limits, has been made by Constable Houghton during the past two weeks. Seven teen cows have been impounded and three convictions secured against their owners. The town council have on numerous occasions warned owners of livestock that they would be prosecuted if they continued to allow their cattle to roam at large within the town limits and they are now taking measures to stop this practice.

Gravelling Work Proceeding

Under contracts already awarded, some 150 miles or more of gravelling and re-gravelling of existing highways have been completed, according to a progress report issued by the provincial public works department. This work is proceeding on some 27 sections of main highways in different sections of the province.

Tennis Notes

Fernie tennis club was well represented at the local courts on Sunday when twelve players competed against the local players in a friendly inter-club tournament. Coleman won the majority of games played while the visitors won sufficient matches to keep interest in the competitions throughout the afternoon. The local players were hosts to the visitors at a supper in the White Lunch cafe.

Fernie players taking part in the games were the Misses Mills, Quail, Coughlin, Hughes, Klauer, Carver, and Messers Cole, Coughlin, Ross, McLean, Wallace, Firth. Shone defeated Jenkins and J. Kwasnie defeated R. Kwasnie in the first round of the McGillivray Cup competition.

COLEMAN HOMING SOCIETY

Result of race from R-d. Deer to Coleman Birds liberated at 5:24 a. m. arrived 11:5:16 a. m. Distance 186 miles, airline.

J. Anderson 960.0 yds
W. Pryde 959.58 yds
C. Roughhead 958.51 yds
C. Makin 958.9 yds
J. Sudworth 955.4 yds
J. Claes 948.9 yds
T. Jackson 946.5 yds
C. Roughhead 945.8 yds
F. Beddington 943.3 yds
W. Harrison 941.9 yds
A. Belgum 784.0 yds

Prizes for the race were donated by Antrobus's Shoe Store and Henry Zak.

Alberta's Unemployment

Total unemployment registered at provincial labor bureau was 8,595 in the week of August 11, which is somewhat reduced from former figures.

ST. PAUL'S UNITED CHURCH

Mr. Upton, of Bellevue, will conduct morning service at 11 a. m. Sunday School at 12:15. Mr. H. Snowden will conduct the evening service at 7 p. m.

Scout Travels Around World

Kenneth Holt, young Toronto Boy Scout, called on Scoutmaster Jones on Sunday on his way home from a trip around the world. He completed his grade twelve at the age of fourteen and started out with a pack on his back to see the world. Holt has visited scouts in every country and has just now returned from Tokio.

C. R. Harris and F. J. Heal, of Maycroft, are the guests of Mr. and Mrs. W. J. Harris.

WEDDINGS

HAYSOM--APPONEN

The marriage of Idris J. Haysom, second son of Mr. and Mrs. W. H. Haysom, to Lempi Apponen, second daughter of Mr. K. Apponen, took place on Sunday, Aug. 19, at the home of the bride's father. Rev. A. E. Larke, minister of Blairmore United church, conducted the ceremony.

The bride wore a pink, ruffled organza dress. Her bouquet consisted of lovely pink roses. She was attended by her sister, Aileen, who was prettily attired in pale blue chiffon, carrying a large sheaf of pink carnations. Always, brother of the groom, was best man.

A delicious wedding breakfast was served following the ceremony. The house was attractively decorated with various kinds of flowers. The bride couple motored to Waterton to spend the day. They will take up residence in Bellevue. Mr. Haysom owning the Bellevue Pharmacy there.

Doctor and Mrs. R. P. Borden and family returned on Monday after spending a month camping at the North Fork.

Mr. and Mrs. Van Duzer returned home on Sunday after spending a week at the lake.

Mr. and Mrs. J. Burrill left on Monday morning for a two weeks vacation at Drumheller. On their return they will stop over at Lethbridge for a few days.

Local News

Mrs. V. Colgrove and son Ronald are visitors at Pincher Creek.

Mrs. J. Fraser and Pat returned home on Tuesday.

Rosa Powell is visiting at the home of his father G. R. Powell.

Mary Atkinson and Margaret Milley returned on Tuesday after a two weeks' outing at Waterton.

Bob Borden received word to day that his application to Kingston university has been accepted.

Harry Clifford is spending the week in Coleman at the home of his mother.

Mrs. Joe D'ereco, Tony and Nellie motored to Kimberley over the week end.

Mr. and Mrs. H. Sherratt and family are spending their vacation at Calgary this week.

Mr. B. Benitto returned on Saturday from Italy, where he has spent the last year.

Elidio Salvador, Hector McDonald and Tino D'Andrea spent the week end at Waterton.

Robert Pattinson, Vic Lylin and J. Atkinson are spending a week's vacation at Waterton Lakes.

Mr. and Mrs. Wm. Lees left on Sunday morning for a three weeks vacation at the coast.

Mr. and Mrs. Charles Graham and family were Coleman visitors last week, the guests of Mrs. Alex Easton. They returned to Lacombe on Friday.

Coleman Juniors Trim Corbin Juniors 8-1

Local Youngsters show Real Talent in Soccer Exhibition

Coleman juniors displayed their wares for the approval of local football fans last night when they opposed the Luckless Corbin Juniors and administered an 8-1 trouncing to the visitors.

The local youngsters showed real talent and under the able coaching of Freddie Beddington this talent will be developed to a high degree. Coleman were much larger and heavier than their opponents and displayed a better brand of football. Several of the players bit their knees for the game over ride their judgement with the result that where ever the ball was that is where they wanted to be.

Douglas Moore was the spearhead of the Coleman attack. His strong shooting resulted in four goals while Booth came next with two. Smith and Pietroski account for the other two goals. The lone Corbin goal came when a misuser standing across between the Coleman goalkeeper and the two backs, Doran, rushing in to score with a free shot on goal. Final result Coleman 8 Corbin 1.

Coleman: Zulis, Houghton, Emmerson, Booth, Jackson, D'Appolina, Raulton, Beddington, Moore, Smith, Pietroski. Corbin: Herd, Wartlek, J. Greig, R. Greig, R. Taylor, Minchuck, Pietruski, Haile, Coates, Doran, N. Taylor.

This Changing World

Probably no period of recorded history can show such a succession of surprising and kaleidoscopic changes, political and economic, as that through which we are passing. The vast complex of peoples and nations comprising the civilized world to-day is in a state of uniformly unstable equilibrium—an equilibrium disturbed from time to time by a variety of insurgencies—both major and minor. So frequent are they, so unexpected their character, so far-reaching their effects, that few even of the great among the prophets dare risk portraying the face of things to come in the immediate future. They feel safer in making (and indeed they prefer to make) their predictions at long range, and to envision a world more remote in time than that which is likely to concern much the present much-abused generation.

The political and economic changes which occurred during the stormy years of 1914-18, the revolutionary upheavals which wrecked dynasties and brought new state forms into being, probably were larger in scale. But they were not so numerous nor, for that matter, did they strike with ruder shock than those of more recent occurrence. The protracted strain of the war itself served to dull and deaden the sensibilities of the people directly subjected to it, and, more inured to shock, they were inclined to lump all the catastrophes into one—the War. They were inclined, too, to the belief that, once peace were reached, the new world would quickly revert to the pre-war basis and settle anew to the ordered routine which seemed so stable until the unexpected happened at Sarajevo.

The world, however, has refused to settle down, refused to revert to the former status. The well-ordered machine which made this seem the best of all possible worlds until the summer of 1914, has never regained its old momentum. The people hanker for peace and a chance to routine their existence. They wish to lead the new world quickly revert to the pre-war lines. But peace is denied them—peace, security and comfort, the comfort which comes from an assured livelihood. All is unrest. They feel they sit upon a volcano about to erupt, and nerves agitated by uncertainties make them the more susceptible to the recurrent shocks which evidence the turmoil beneath. Thus the crises of the depression appear more menacing than those which occurred during war-time which stunned, rather than agitated.

Recent events in Austria and Germany are symptomatic of the times. The world looks on with anxiety while these two nations wring in their efforts to evolve a state form which can bring harmony and happiness to their peoples. Equally significant to the world at large, however, are the experiments being tried in the United States and in Great Britain to evolve a new economy which will give work to the workless and restore the prosperity both, in the past, have enjoyed. Both experiments involve complete revolutions in the national economic life of those countries, but few would agree that either yet had found the solution which is needed.

It is unnecessary to enumerate the many changes during the period of depression. Books on political and economic subjects become obsolete in a day. Anyone who reads knows that. Take, for example, the following quotation from a book which reached shelves of public libraries in Western Canada little more than a year ago:

"Nobody doubts, for instance, that America will overcome the present difficulties once it gets a grip on itself. France is sitting comfortably, and even Germany is held to have a fair chance. . . . But the issue is more doubtful for Great Britain because her malady seems more fundamental. Already, the British Empire has fallen from its former high estate."

The picture has been entirely reversed since then. Scarcely a statement in the quotation stands to-day—and that is but a sample of the dangers besetting the world's present. This dynamic, fluid world. Apparently, the unstable condition will continue until every nostrum and every alleged cure-all has been tried and tried in vain. Then perchance, a world on the verge of ruin will realize that it is not so much the medicine that is wrong as the diagnosis. Indeed, were international enmity replaced by international amity almost any kind of political or economic medicine might cure remaining ills.

Realises Its Value

Governor-General Is Patron To Junior Farm Clubs

Club members and everyone associated with club work for farm boys and girls will sincerely appreciate the great honor that has been accorded to the junior farm club movement by His Excellency the Governor-General, the Earl of Beesborough, who has extended his patronage to the Canadian Council on Boys' and Girls' Club Work.

The recognition that His Excellency has thus given to the value of junior club work in Canada should encourage greater activity on the part of every club member and stimulate a deeper sense of the opportunities that are provided in this form of agricultural extension.

Up To The Architect

Instead of saying that man is a creature of circumstance, it would be nearer the mark to say that man is the architect of circumstance. It is character which determines existence out of circumstance. From the same material one man builds palaces, another hovels, one warehouses, another villas. Bricks and mortar are mortal and bricks until the architect can make them something else.

Diarrhoea, Dysentery, Colic Cramps and Stomach Pains

Prompt treatment with Dr. Fowler's Extract of Wild Strawberry in such cases relieves the pains, checks the looseness of the bowels, and thus does away with the suffering, the weakness, and oftentimes the collapse associated with attacks of this kind.

It does this by checking the too frequent and irritating stools, settling the stomach, and bracing up the weakened system, thus making it a remedy for the treatment of bowel complaints of both young and old.

On the market for 88 years—you do not experiment when you use it.

Put up only by The T. Millburn Co., Ltd., Toronto, Ont.

Seeking New Height Record

Wiley Post Will Use Flying Suit He Invented

With a specially constructed flying suit of his own invention, Wiley Post, world-circler, will soon take off in an attempt to better the present altitude record of 47,332 feet.

His well-known companion, the "Winkle Man," a ship almost as famous as Lindbergh's "Spirit of St. Louis," has been remodelled with the addition of a new 420-horse power motor and two superchargers so that his speed is expected to be increased to 350 miles per hour at ordinary altitudes, and "seemingly impossible velocities in the stratosphere where air resistance approaches 'nil'."

Post's flight is not primarily for purposes of breaking records, but to test his aircraft, he has announced.

"Engineers have always said if we had a variable pitch propeller and a super-charged motor we could fly in any altitude if the body could function normally," Post explained. "Well, we have the propellers and the superchargers and I believe this suit will conquer the last obstacle."

The suit consists of rubberized fabric trousers covering the entire trunk of the body up to the shoulders and a rubber top piece capped by an aluminum head gear. The wearer will get air through the supercharger, which also supplies the motor. The suit, of course, is airtight.

Post hopes to get enough information in his initial test to aid him in winning the \$50,000 London-to-Australia derby next October.

The water ouzel is the only song bird that has learned to dive into the water for its food.

British Dominions

Emigration Society

Secretary Returns To England After A Visit To Canada

Concluding his forty-second visit to Canada from Britain, Robert Culver, secretary of the British Dominions Emigration Society, returns on the Cunard White Star liner Ascania from Montreal.

"I am impressed," declared Mr. Culver in an interview, "with the improvement in Canadian business conditions over last year. There are many signs of material progress and a feeling of returning confidence among influential people I have met here this year. I feel that before

Rock Slide At Niagara

Huge Chump Weighing Thirty Million Pounds Goes Over The Falls

A gigantic pile of rock estimated to weigh 30,000,000 pounds rose above the water in Niagara gorge recently, visible evidence of the second major rock slide from Horseshoe Falls since 1931.

Water was flowing over what was dry rock as nightgazers thronged to the shore of Goat Island in an effort to obtain a view of the jagged, saw-like rim of the falls and the huge pile beneath it. But mist obscured the view, shrouding the secret of Nature's wonder.

The huge chunk fell from the cataract with a deafening roar that seemed to still the sound of water pouring over the precipice. The rock landed in the gorge, sending a spout of water more than 200 feet into the air.

The lip of one of Canada's great wonders lifted as if from a charge of dynamite, heaved, groaned and slid away with a roar. Where there was only a dribble of water a huge stream began to pour.

Niagara Falls, in its recent break, demonstrated a geological belief that this scenic wonder is only the last of the American Niagaras, and like the others, is headed towards extinction within perhaps 20,000 years.

Brazil is chiefly an agricultural country and the diversity of climate facilitates the cultivation of practically every agricultural product. Nevertheless, Canada in the fiscal year 1933-34 exported \$327,511 worth of agricultural and vegetable products to Brazil, including wheat and showing an increase of \$202,108 on the preceding year.

Right Hon. and Right. Rev. The Lord Bishop of London, The Right Rev. The Lord Bishop of Stepney, The Right Hon. Lord Lloyd, The Right Hon. Lord Middleton, Sir Archibald Weigall.

The society's Canadian manager is R. Gordon Burgoyne of Montreal; the local committee includes many business and professional leaders.

Committees of similar calibre co-operate with the society in Toronto, Halifax and Saint John, N.B.

Assistance to emigrate takes the form of grants or loans made under varying conditions to suit circumstances, to British-born subjects of good character and sound health; also of advice and help to settlers after their arrival.

Robert Culver and R. Gordon Burgoyne of the British Dominions Emigration Society, who returned to Britain on the White Star Liner Ascania.

"It has been found by our representatives in Canada," Mr. Culver said, "that large numbers of men go out, leaving their wives and families behind, with every hope and good intention of soon being able to send for them. They make good in the various cities and towns throughout Canada, but very quickly find that after keeping themselves and sending money home to help to keep their wives and families in Britain, it is utterly impossible for them to save the amount required to bring their wives and families out. One of two things is then bound to happen—the men have to throw up their good permanent work in Canada and return to the Old Country to swell the ranks of the unemployed there, or they have to receive assistance towards the cost of the transportation of their wives and families. We are very glad indeed to be able to take up this work, which we feel is of considerable importance."

Makes "Color-Music"

Attachment For Piano Invented By English Engineer

I. Shamah, English electrical engineer, has invented an apparatus for making "color-music" which may be used in any home as an attachment to a piano. By means of this, a drawing room may be flooded with diffusing lights which will automatically react in colors to whatever tune is played. He has also graded the vibrations of a piano in proportion to each other that each note has its own exact shade, so that it will be possible for instance, to play "God Save the King" in a combination of shades varying between red, white and blue; the "Blue Danube" in green and blue, or the "Moonlight Sonata" in yellow and silver. Another invention by Mr. Shamah enables one to "feel" music. You hold two metal tubes and when a tune is played you feel the rhythm of it like a beating pulse, which sends a pleasant tingling sensation up the arms.

Telephone Of The Future

Eighty-Three-Year-Old Scientist Working On Improvements

Sir John Ambrose Fleming, a celebrated scientist who has had a good deal to do with the development of telephones, is the inventor of the thermionic valve—which made wireless telegraphy possible. "In a few years' time," he said the other day, "we shall probably chuckle over the recollection of what telephones were like in 1934. Everybody knows that the telephone is in its infancy; everybody knows that it can be improved enormously. What form will that improvement take? I am a scientist, not a prophet. The telephone may be a little box that you can carry in your pocket. It may become more elaborate than it is today. I do not choose to prophesy. I'm certainly not going to tell you on what lines I am working now to improve the telephone." Sir John Fleming is 83, and a very busy 83.

Making The Roads Safe

British Courts Do Not Handle Reckless Drivers Easily

British courts are ruthless with motorists who carelessly endanger the lives of others. Kaye Don is under sentence on this account, and another example is to hand in the sentence of a girl, recommended to mercy by the jury and therefore getting off with half the term the judge had intended to impose, sent to jail for six months for manslaughter. She said she had been ill and took some gin to relieve the pain, and had had three bottles of beer as well as the gin. Her driver's license was revoked and she was disqualified for life from driving. This is the way to make the roads safe.—Hamilton Herald.

Made Fast Trip

A homing pigeon, owned by Arthur Milner of Sault Ste. Marie, made a hop of 501 miles from Minneapolis to Sault Ste. Marie, in 25 hours. Released at Minneapolis one day at 9 a.m., the bird arrived at 10 a.m. the next day.

Bridge and bridge tournaments are regarded as gaming in England.

The First Motorcycle

Fiftieth Anniversary To Be Celebrated In Germany This Year

The fiftieth anniversary of the first motor-cycle is to be celebrated this year; a monument is to be erected to Gottlieb Daimler, in Schorndorf, Germany. Working behind the shutters of a shop in Stuttgart, Daimler and Wilhelm Maybach made the first motor-cycle, and in the same year the first motor-boat was launched in the river Neckar, a tributary of the Rhine. Believing the inventors were manufacturing counterfeit money, the police raided their workshop, and as there was considerable public fear of petrol, wires mounted on porcelain insulators were placed around the premises to give the impression that the motive power was electricity. In the following year the first "horseless" carriage left the shop. It was an ordinary horse-drawn carriage with metal tires in which one cylinder of 1½ horsepower was mounted. It achieved a speed of eleven miles an hour.

A Pulpit On Wheels

Sexton Places It Where People Can See Minister

In the Church of St. James, Cleveland, is a pulpit on tram lines. The pulpit which existed before 1888, was very high and ugly, so it was decided to cut it down to its present proportions. When placed in a certain position in the church it concealed the altar, and when in the only other suitable position, people in the gallery could not see the preacher. Now, before the sermon, the sexton pushes the pulpit "on" lines to the centre of the church, and after the sermon it is pushed back again.

Gigantic Wine Cask

Heidelberg's famous cask will be a mere barrel compared to a wooden giant under construction at Bad Duetzchen, Germany, and destined to be the world's largest wine vat. Resting on foundations of concrete it will have a capacity of 350,000 gallons, against the mere 50,000 gallons of the Heidelberg barrel.

OFF COLOUR? HOW IS YOUR LIVER?

Wake up your Liver Bile —Without Calomel

Your liver's a very small organ, but it certainly does a lot of work, and eliminating out of the body, by reflexive action, its daily two pounds of liquid bile into your bowels. You need a complete, correct, such a condition by taking saline, oil, mineral water, laxative candy or chocolate gum, or roughage. When they've moved your bowels they're through—and you need a liver stimulant.

Carter's Little Liver Pills will soon bring back your bowels to normal. They're pure, pleasant, safe. Ask for them by name. Refuse substitutes. See a list of druggists.

Has a hundred uses. Always have a box in the kitchen.

W. N. U. 2060

Hail Losses In West Said To Be Mounting Over Four Million Mark

Winnipeg.—Western Canada's hail losses Sunday morning were mounting over the \$4,000,000 mark with scores of acres of wheat and coarse grains ravaged by the icy pellets.

Reports from southern Saskatchewan were confirming estimates of \$1,000,000 damage in hail losses to crops and property in a storm which swept wide areas Friday night and Saturday.

Last Tuesday \$500,000 damage was done by a hail storm which cut an area 10 miles wide and 50 miles long in southern Alberta. Previously hail losses in northwestern Saskatchewan and north central Alberta, chiefly around July 10, caused \$2,000,000 damage to crops. Other scattered storms, some in sections of Manitoba, were believed to have caused losses in the neighborhood of \$500,000.

In Alberta, dust storms preceded rain. Calgary and surrounding districts bore the brunt of the storm, which darkened the sky and brought a halt to traffic. The wind reached a velocity of 50 miles an hour. Hail fell with the rain damaging crops in rural areas. Trees were cut down and signs blown from their stands. Small sheds and buildings were overturned.

More than \$1,000,000 loss came late Friday when a terrific windstorm swept across central Saskatchewan, smashing barns, garages and sheds from Davidson to Southey.

A 75-mile-an-hour, churned crops and countryside over a 100-mile path, with hail adding to farm losses.

Assistance For Indians

Aid Given To Indians In Saskatchewan Was Third Lowest In Dominion
Regina, Sask.—Cost of assistance among the Indian population of Saskatchewan in the year 1933-34 was only 494 for each individual assisted, according to W. Murison, Saskatchewan inspector for Indian affairs.

This is one of the three lowest figures in the Dominion, and it covered hospitalization, food, clothing, implements, seed grain and other relief expenditures.

Mr. Murison returned to Regina after a three weeks inspection tour of Indian agencies through the province. He was accompanied by Dr. H. W. McGill, deputy superintendent-general of Indian affairs at Ottawa.

Japan Wants Friendship
Victoria.—"Japan desires the friendship of the world much more than she wants territory," K. Inaba, a member of the house of peers and Japanese industrialist said here recently following his arrival from Yokohama. He is en route to Belgrade to attend the forthcoming world inter-parliamentary conference.

Road Accidents In Britain
London.—Despite the drive for more safety on the highways, 126 persons were killed and 5,595 injured on the roads of Great Britain last week.

Pays Tribute To Pioneers Of Province Down By The Sea

Saint John, N.B.—A monument to the achievement of man over great hardships, a source of genius which had enriched the entire Dominion and a land of opportunity for the youth of to-day, was the picture of New Brunswick after 150 years of existence as a province, given to a vast audience by Prime Minister R. B. Bennett.

The commission constituting New Brunswick was executed by the British crown on August 16, 1784, and dignitaries of the church and state, the army and the navy, joined with thousands of citizens to make the sesquicentennial with pageantry and oratory.

Highlight of the proceedings was the dedication of the new provincial museum, erected as a symbol of 150 years of progress.

In spite of improving economic conditions and evidence of recovery on every side, Canada in common with most of the world had still to solve one of the sternest problems growing out of depression—the ques-

Canada And Australia Reach An Agreement

Australia Not To Sell Flour In Eastern Canada

Ottawa.—Under an arrangement arrived at by the governments of Canada and Australia, the latter will prohibit further shipments of Australian flour to Eastern Canadian ports free of customs duty.

Announcement of the new arrangement was made at the office of the prime minister. The matter has been under negotiation between the two governments since last June when Canada gave notice, as provided by the trade agreement, that the sale of Canadian flour was being prejudicially affected by shipments of Australian flour into eastern Canadian markets.

It was explained there has been a market for Australian flour on the west coast for many years. The arrangement now reached will not interfere with this.

Feed Situation Not Greatly Improved

Dried-Out Parts In Alberta To Be Checked Up

Edmonton.—Intensive investigation is being conducted by the provincial government into hardships caused by drought and hail in certain sections of Alberta, Premier Elphinstone said.

The premier was interviewed by a delegation, members of which placed their various situations before him. Replying to the delegation, the premier said that it was apparent some relief would be needed in dried-out parts, and while there was some possibility of improvement in the feed situation, only a slight possibility existed. Therefore, arrangements were being made for a canvass of the situation.

Effect Big Saving

Ontario Premier Says Saving Of Two Million Dollars Already Effectuated

Newmarket, Ont.—Premier Mitchell F. Hepburn of Ontario told a North York Liberal convention the government had made a \$2,000,000 saving in administration expenses since taking office and declared an audit \$100,000 would be saved in the auditing of departmental books.

The convention selected Col. W. P. Mulock as the Liberal candidate for the federal by-election in North York.

Might Mean Complications

Montreal.—Any tampering with the British North America Act would be bound to entail serious complications, Premier L. A. Taschereau, of Quebec, declared here. His statement was made when questioned concerning the reported plan of Premier R. B. Bennett to call an inter-provincial conference in the fall to study certain amendments to the constitution of the Dominion.

B.C. Wage Law Approved

Retailers Endorse Minimum Excepting For Delivery Work

Vancouver.—The executive of the Retail Merchants' Association, Vancouver, in a statement, endorsed the minimum wage of \$12.75 set for youths between 18 and 21 years of age after one year's service, but expressed the view a special situation existed in regard to those engaged only in delivery work.

The statement said: "Any young man between the ages of 18 and 21, who, after a year's experience in selling goods to the public, is not profitable to his employer at \$12.75 per week, is certainly not fitted for the job or is being exploited by the employer. We have no sympathy with such employers."

With regard to delivery boys the executive stated a delivery boy of 18 to 21 cannot produce any more for his employer than a boy of 17, as the younger boy will deliver just as efficiently.

The executive is therefore asking that until the legislature brings in a minimum wage law for boys under 18, some special consideration be given in the case of older boys doing delivery work.

Labatt Is Released

Victim Of First Ransom Kidnapping Returns Unharmed

Toronto.—Darkness that enshrouded the release of John S. Labatt, wealthy brewer, of London, Ont., was pierced when it was learned that the kidnapper had been brought to the hotel from which his brother Hugh conducted negotiations with the abductors.

The brothers left the hotel secretly and sped to London where John S. Labatt met his wife and three children. The victim of Canada's first ransom kidnapping was unharmed but haggard and nervous.

With his brother he entered his home and even closest friends were not permitted to disturb him. Complete rest was the order for the millionaire who suffers from a heart ailment, an affliction that caused grave concern while he was in the hands of the gangsters.

Clarke Savage, of the law firm of Ivey, Elliott and Gillanders, announced the termination of the three-day search for Labatt, a search that saw all the forces of the law available in the province thrown into action.

Auction Sale Of Cars

Ontario Government Cars To Receive Publicity

Toronto.—Auction sale of nearly 100 Ontario government automobiles will be held August 28 at Varsity stadium, Premier Mitchell F. Hepburn announced recently. The cars will be passed in review, bearing the names of the members of the former cabinet who rode them.

Bidders will occupy the main grandstand and the auctioneer will stand on a platform directly in front of them. Besides bearing the names of the cabinet minister, the cars will also carry placards showing the mileage covered and the cost of upkeep during the car's life.

HEADS DELEGATION

Dr. John MacNeill, formerly of the First Baptist Church, Winnipeg, who is the chief Canadian delegate at the World Baptist Alliance which is meeting in Berlin, Germany. Dr. MacNeill is president of the congress, which is attended by delegates from sixty countries.

To Teach Agriculture

Subject For Ontario Schools Beginning At Third Year

Fort William, Ont.—Speaking at the Lakeside exhibition, Hon. Duncan Marshall, minister of agriculture in Ontario, announced that the new government had decided to have agriculture taught as part of the public school curriculum in the province, beginning at the third book.

The minister of education is now working on the details which will involve the instruction of teachers in the upper grades. The Hepburn government, he said, had as its aim the improvement of marketing and educational conditions to meet the needs of the farmer, and intended to try to give all children passing through the schools an insight into and love of agriculture.

Wheat Sales

Alleged That British Interests Made It Difficult To Sell Wheat

London.—During the past crop year British interests took a position in the Winnipeg market which made it difficult for Canada to sell her crop. John MacFarland, general manager of the Canadian Wheat Pool is reported to have declared at a closed meeting of the international wheat advisory committee.

Increased offerings at Liverpool on the part of Argentine shippers depressed the market. Mr. MacFarland is supposed to have stated. The British traders' action in Winnipeg is said to have followed "in an effort to forestall any sudden rise in prices, should the Argentine pressure be relieved."

Heavy Barley Yield

Lethbridge, Alta.—A yield of 553 bushels of barley from 4.9 acres, an average of 109 bushels per acre, has been reported from the Smith farms just east of Lethbridge. The crop was grown from four bushels of Elite strain of Trebi barley and weighed 55 pounds per bushel.

Canada Must Change Her Business Methods Says Hon. H. H. Stevens

Influence Of The Press

Canadian Weekly Newspaper Association Holds Annual Convention

Montreal.—The influence that the weekly Canadian press wields, the recently improved standard of its editorial content, and the potential power that it possesses in shaping public opinion throughout the Dominion, were the points emphasized at the opening session of the Canadian Weekly Newspaper Association, holding its 15th annual convention here. At the same time, delegates are celebrating the seventh anniversary of the formation of the Canadian Press Association, out of which, in 1920, sprang the three separate organizations that now exist—the Canadian Daily Press Association, the Canadian Weekly Newspaper Association, and the Canadian National Newspaper and Press Association.

The president, Charles Clark, of High River, Alta., in his presidential address, recalled the time when people bought papers for news and editorials and the advertisers came in to help along a local enterprise, and compared this with present-day conditions. Weekly papers had been through hard times but they stood higher than ever to-day in the public estimation and wielded a powerful influence because of the spirit of independence they had maintained.

Later, technical matters were discussed, followed by a garden party given by Lord Atholstan. There was a large registration of members for the convention.

Admiral Byrd Recovering

Takes Stroll In Open Air With Temperature 61 Degrees Below Zero

Little America, Antarctica.—Rear Admiral Richard E. Byrd had recovered sufficiently from a touch of bad health to take a stroll in the open air at his advance base, 123 miles south of here. The admiral had a temperature of 61 degrees below zero for his stroll.

Dr. Thomas C. Poulter, second-in-command of the Byrd expedition reported the trip back to Little America will depend on the health of Admiral Byrd.

For Big Navy

Washington.—Aiming toward a fleet second to none in the world, the United States navy opened bids for 24 fighting vessels. Included are four cruisers, 14 destroyers and six submarines. The submarines and destroyers will be the first vessels laid down under the act of congress authorizing the building of the navy to treaty strength.

Wheat Conference Delegates Debate Issue Of Acreage Reduction

London.—Delegates to the international wheat conference engaged in a "free-for-all" debate on the issue of acreage reduction, an agreement on which is being urged by the Canadian-United States-Australian bloc. This bloc, composed of three of the four big producers—Argentina is the other—is seeking an agreement also on tentative export quotas as well as a quarterly system of quotas, which would be more elastic than the annual system in effect last year.

A communique stated that no quotas have yet been arranged, and the sub-committee which will draw up figures has not yet been named. It was believed that Canada, with huge stocks, may get the full 268,000,000-bushel tentatively agreed upon several months ago.

Whether Argentina gets the 148,000,000 discussed at that time would appear at present to depend upon how much progress has been made in acreage reduction.

Both the United States and Australia, it was said authoritatively, are likely to take substantial reductions below the tentative allotments of 150,000,000 and 84,000,000 bushels.

The three-nation bloc is interested in obtaining a commitment from Argentina for further acreage reduction. It is known that Argentina is asking a quota of 150,000,000 bushels as its export allotment for the year ending July 31, 1935, and that the United States is willing to take a considerable reduction in her

quota. It was said on good authority that the United States might accept a quota of 30,000,000 bushels.

It was understood Russia now is ready to accept a quota. She refused to take this step last year. Indications now are that the Soviet will have little, if any, wheat to export during the year.

Owing to favorable reports from Canada, the delegates of exporting nations are now more optimistic that wheat prices will attain the level at which importers promised to reduce the tariff barriers—namely an average of 63.08 gold cents a bushel, maintained for 16 weeks.

John I. McFarland, of Winnipeg, chief Canadian delegate, expressed dissatisfaction at the European reduction, saying that 85 per cent. of the wheat acreage reduction had been accomplished by overseas countries. He estimated that 13,000,000 acres had been taken out of the wheat-producing lands in the last year, aside from reductions in Russia and China, and he called this reduction "a solid achievement to the credit of the international wheat agreement."

An interesting disclosure, made to the conference by Andrew Cairns, of Canada, was that the average price of all wheat imported into Great Britain during the first five days of August was 55.6 per-devaluation gold cents a bushel, the highest price since the wheat pact was signed.

Gangster's Weapons

United States To Stop Sale Of Machine Guns

Washington.—The United States government seeks to stop free circulation of the gangster's favorite weapon—the machine gun.

If a person possesses a machine gun after next month he will have to register it with the commissioner of internal revenue.

If he wants to get one after Sept. 14 he will have to get an order from the commission, be finger-printed, and pay a price boosted by a sales tax of \$200.

Would Drop Preference

London.—Growers of the United Kingdom voted to drop all preference for Australian foodstuffs because of an Australian tariff affecting Lancashire cottons. It was explained in Australian circles here that the tariff was necessary to correct an adverse trade balance.

PARADISE BLOOMS IN THE PRAIRIES

It isn't a pretentious house, this home of William Ballagay, near Abernethy, Saskatchewan, but flowers and shrubs have turned it into a beautiful spot. With a belt of Manitoba maples on the west side of the farm, which affords shelter from the prevailing winds, almost every type of flower listed in the seed catalogue is growing in the garden, while trees and shrubs have added wonderful charm to the meadow old place. The top picture shows the vegetable garden at the back of the house which would supply a small village with its vegetables, while the bottom picture shows a section of the front garden.

THURSDAY, AUG. 23, 1934

NOTES BY THE WAY

IN PLACE of the usual "Notes and Comments" a few impressions of the editor are given on the trip to Montreal to attend the annual convention of the Canadian Weekly Newspapers Association, which every year is held in a different province in order that the editors may widen their knowledge of conditions and develop new contacts which are of value in every business, particularly so in the newspaper profession.

LEAVING Coleman on Aug. 11, the rugged grandeur of the mountains is quickly left behind and Lethbridge, southern Alberta's progressive little city, is the first halt, where the only diversion in the twenty minutes wait is to have a sandwich and a cup of coffee and to listen to the casual conversation of others who are eastward bound.

THE irrigated area around Lethbridge and Taber is a refreshing sight, for bounteous crops greet the eye on either side of the railroad, until the train runs into the non irrigated area, where parched land has a rather depressing effect.

ROLLING onward to Medicine Hat, passing the time in conversation with a few railroad men returning to their homes, and exchanging reminiscences with one who served in the Canadian Mounted Rifles during the Boer War of 1899-1902, the city which Kipling described had all hell for a basement, where natural gas is so plentiful that street lights are continually burning, is reached, where we detain to make connections with the main line train with its powerful locomotive and long string of cars—a rolling hotel with its sleeper, dining and parlor coaches.

TRAVELLING throughout the night, Moose Jaw is reached early on Sunday, where a break is made in the journey to spend the day with old friends and neighbors of Saskatoon.

AN interesting visit was made to the extensive manufacturing plant of the Robit Hood Flour Mills, which is now working 24 hours per day and which one day last week forwarded 17 cars of products to be shipped via Fort Churchill to European distributors. This city, an important railroad centre of about 20,000 population, despite five years of depression and poor crops in the rural areas, presents a lively appearance. It possesses a very fine recreation park and swimming pool in the heart of the city and it is of peculiar interest to note that the water for the swimming pool, which with its briny taste, resembles sea-water, was obtained somewhat by accident. Deep borings were being made for oil or gas, and at about 3,000 feet the drill ran into a heavy subterranean flow of salt water with a temperature of about 98 degrees. Search for oil or gas was given up, but the water was turned to good use, for a very fine swimming pool, with hot and cold showers, violet ray lamps, sun rooms and other appurtenances was built, and in which the Moose Jaw girl who won two events in the British Empire games received part of her training. We spent over half an hour of a warm afternoon in the pool, and swallowed an occasional mouthful of the salt water, but it was very refreshing, even if there was hardly room to swim in such a crowded pool, for it is a very popular resort, especially in hot weather.

PROCEEDING eastward by day from Moose Jaw, we experience the discomfort of hay fever caused by the dust which permeates every coach in the train as it whips along over mile after mile. Towns of interest between Regina, Saskatchewan's enterprising and progressive capital, and Winnipeg, gateway to Western Canada, include Qu'Appelle, after which the Anglican diocese of Qu'Appelle is named; Moosomin, the old judicial centre of Eastern Assiniboia in the days when Saskatchewan was a part of the Northwest Territories, and which the writer first set foot in 28 years ago; Brandon in Manitoba, another place we remembered well, for 31 years ago we slept on a bed made up on a billiard table, in company with three other adventurers into the Canadian west, because there was no other accommodation vacant at the time; and so on to the bustling city of Winnipeg. On the train journey, an interesting conversation was carried on with a former farmer acquaintance from the Jewish colony in Southern Saskatchewan, who stated that five years of successive crop failures had left him with nothing but an old-age pension of \$15.00 per month, while many other farmers once well-to-do were in the same plight, after more than 30 years of honest toil on the land and raising families. Many retail merchants had suffered to a corresponding degree, and taxes were remaining unpaid. There was a note of tragedy in such experiences, for most of these sufferers were victims of conditions over which they had no control. The last we saw of our farmer friend was his trudging off through the station at Winnipeg to seek a relative, presumably to secure assistance and advice.

SO, with feelings of sympathy, and recollections of better days in the "Golden West", we leave the plains for the bush country east of Winnipeg, reaching Kenora in about four hours, where gaily colored electric lamps festooned across the streets give a welcoming atmosphere to visitors to

At the price only Pontiac gives you all these Features

LOOK at them all—ride them all—check them point for point—Pontiac against the field. And you will find that only Pontiac, at or near the price, gives you all the major advancements listed above.

No useless trifles here! Each one is a vital factor in improved performance and car personality.

True, Pontiac presents one of the smartest airstream designs of the year. True, ability, riding quality, safety, economy—in fact every item of motor car desirability has been improved. But dependability remains, as always, Pontiac's first claim to your interest.

Built into this car are long life, satisfaction, expense-free service... typical General Motors value.

Investing in Public Service

(From Christian Science Monitor)

When Mr. Samuel Ferguson, president of the Hartford Electric Light Company, invited the people of his city recently to hire electric ranges from the company at 30 cents a week, installation free, utility experts sat up and took notice. This was a heroic effort to boost consumption of electricity, generally considered the forerunner to lower rates. The possibility of repairs eating up the profits, of dealers refusing to co-operate, did not deter this man, who only a short time before had described the public utility business as "a public trust under which the public gives the company a monopoly and investors give the company capital."

Mr. Ferguson's record reveals a consistent effort to subordinate the profit motive to the public interest. As a result, instead of going to the poorhouse, as some of his friends expected, his business has become nationally known, his methods have been viewed as exemplary industrial statesmanship. Having won the confidence of investors and the public, it is not surprising that Mr. Ferguson's ranges were rented promptly. Rentals are now being converted into sales at a rate insuring permanently increased consumption.

The business of persuading the public to use more electricity is of vital concern to utilities simply because sales above a given volume are practically all clear profit. According to many utility authorities, increased consumption is the answer to the public demand for lower rates. It is said that every utility operator knows this, but that it has never been understood by bankers and other financiers who control the industry and determine its policies.

It was to those who fix these policies, rather than to the actual operating managements, that Mr. David E. Lilienthal, a director of the Tennessee Valley Authority, recently addressed the charge that the "utility industry has not devoted itself effectively to the primary function of making electricity available at low cost to the home." This definitely places the holding companies under fire.

Although defending the holding company for what it has done under proper management to develop the utilities, Mr. Ferguson was one of the few executives to recognize and oppose this form of exploitation in the hands of "get-rich-quick" promoters. "Our ultimate goal," he said, "is complete electrification of every home, thus securing for the people cheaper and more abundant power. Our company welcomes the challenge of the Federal Government to match Yankee dollars and ingenuity against taxpayers dollars and the efficiency of government bodies."

This is the philosophy that won for the Hartford Electric Light Co. a few days ago the coveted Charles A. Coffin medal for "distinguished contribution to the development of electric light and power."

None Today

Sandy McPherson was travelling to Glasgow, and on the way he felt thirsty, so he took out a bottle and drew the cork. Just as he was about to take a taste, a fellow passenger in clerical garb addressed him:

"Excuse me sir, but I am 65 years of age and I have never tasted a drop of whiskey!"

"Dinna worry yersel," said Sandy, "you're no gauin tae start noo!"

Nurse: "I think he is gaining consciousness, doctor; he tried to blow the foam off his medicine."

Orders for Gammed Paper for parcelling machines may be filled at The Journal office. Plain or printed paper may be supplied, at lowest current prices. Printed gammed paper orders should be given one month ahead of requirement, as it takes that length of time to put the orders through the factory.

Here and There

The Open Dominion championship match in the Dominion Marksmen Revolver competition was won recently by the Canadian Pacific Railway Ontario police team with a score of 1435 points out of a possible 1500. J. C. M. P. civic and provincial police also competed.

Plans for the musical festival of Western Canada during the coming year with a tentative discussion of policies for the next two seasons, were featured at a meeting of delegates of Western Competition Festivals recently at the Palliser Hotel, Calgary.

John Jacob Astor and his bride have decided to extend their honeymoon tour to the Canadian Rockies and British Columbia. "We intend to stop over at Lake Louise," said the young millionaire, "and then move on to Vancouver, taking in the sights on the way."

Captain R. G. Latta, skipper of the liner Empress of Britain and commodore of the Canadian Pacific fleet, retired from active duty recently. He was succeeded on the bridge of the Britain by Captain R. N. Stuart, V.C., D.S.O., U.S.N., R.N., R.N.R. Captain Stuart was promoted to the post of commodore of the Canadian Pacific fleet.

Indicating the trend towards greater production and recovery of business, substantial increase in the second quarter of 1934 as compared with the corresponding period of 1933 is shown in the recently published production figures of Consolidated Mining and Smelting, one of the world's greatest mining companies.

Driving a highly decorated locomotive into the Canadian Pacific Railway depot at the end of the Calgary-Edmonton run recently, A. N. Hobkirk, veteran engineer, completed 43 years of continuous service with the railway, most of it at the throttle of an engine. "I have always liked my work and I hate to quit," said Mr. Hobkirk.

Founded June 18, 1874, by George and Mathew Beatty and with agencies, warehouses, offices or depots across Canada, New Zealand, the United Kingdom and fifty other countries, the national and world-wide exporting house of Beatty Bros. manufacturers of washing machines and farm implements, celebrated its Diamond Jubilee at Pergus, Ont., last month.

John F. Sweeting, industrial commissioner of the Canadian Pacific Railway, states in an official publication of the railway that there is a decidedly firm tone of confidence in the West and increased activity in many industries, with the tourist business promising to be better at all resorts this year.

An increase of \$77,500 lbs. in the Nova Scotia lobster catch during the month of May was instrumental in raising the landed values \$332,468 over the same month in 1933, according to an announcement by the Department of Fisheries on June 23th.

WORLD HAPPENINGS
BRIEFLY TOLD

Hon. Irene Parby has been sworn in as minister without portfolio in the Reid government.

The Soviet Union has named M. Ostrovski as its minister to Roumania. Recognition of the Soviet by Roumania came a few weeks ago.

A gold rush has developed north of Grand Marais, Minn., in Ontario, where a vein has been struck which has yielded \$17.50 worth of the precious metal to the ton.

In accordance with a wish expressed in his will, only six cents appear on the tomb of President von Hindenburg. They are: "Paul von Hindenburg, 1847 to 1934."

Old King Winter opened his 1934 assault on Aug. 14 at Horsepayne, Ont., when a high north wind brought with it intermittent snow flurries, at a temperature of 40 degrees above zero.

China exacted retribution for the murder of Dr. J. H. Ingram, 57-year-old American missionary, by bandits two months ago, when the provincial government executed five Chinese convicted of the crime.

The first studio in India for production of sound pictures has been opened at Calcutta. American equipment that can be moved about for production of news reels is being used.

Demand for denunciation of the Washington naval treaty before December 31, 1934, was voiced by high Japanese naval officials, including Minister of the Navy Admiral Osumi, according to reports received from Tokyo.

Premier Mitchell F. Hepburn, of Ontario, renewed his demands for monetary reform before a meeting in honor of Hon. Dr. Leonard J. Simpson, minister of education, and declared Australia had practically settled her economic problems, so Canada could do the same.

Little Journeys In Science

AMMONIA

(By Gordon H. Guest, M.A.)

Ammonia is a colorless gas which has a characteristic, pungent, powerful odor. It is about one-half as heavy as air and is very soluble in water. Ammonia gas is easily changed to a liquid. At ordinary temperatures a pressure of about 66 pounds per square inch is sufficient to liquify the gas.

Ammonia will neither support combustion nor burn in air. Although inactive when dry, ammonia will, in the presence of a small amount of moisture, react with acids to form substances known by the chemist as ammonium salts. For example, on mixing the fumes of hydrochloric acid, which is known commercially as muriatic acid, with ammonia a heavy white cloud of ammonium chloride is formed.

Liquid ammonia is used very extensively in making artificial ice and in producing the low temperature required in cold storage plants. The use of ammonia depends on the fact that it can easily be liquified at ordinary temperatures by applying pressure. When the pressure is released the liquid ammonia evaporates, absorbing a great deal of heat from the surroundings. This evaporation usually takes place in pipes surrounded by a solution of salt which is not easily frozen. This cooled salt solution may be piped to a cold-storage room, or cans of fresh water may be immersed in it to produce ice.

Ammonia gas is very soluble in water and is therefore usually sold in water solution under the name of "aqueous ammonia." It is used as a cleanser both in the home and in the industries. Large quantities of ammonia are used in the manufacture of fertilizers, and in making ammonium compounds such as smelling salts.

The range of the total weekly wages, including cash and allowances, of married ploughmen in the various divisions of Scotland is as follows: In the southern counties, from \$7.84 to \$9.50. In the lower Clyde valley, \$8.84 to \$9.48; in the remainder of the central area, \$7.98 to \$10.20; and in the northern and northeastern counties, \$6.74 to \$7.58. In Scotland as a whole, a single ploughman's weekly wages is \$6.76—Scottish Journal of Agriculture.

New nine gases, built of aluminum, enable men to descend 1,500 feet deeper than formerly; the new cages are 40 per cent. lighter than old types.

W. N. U. 2060

Not What They Seem

Many Things Have No Association With Their Name

Cork legs are not made of cork. They are made of wood, metal, leather, or strong canvas; they were invented by Dr. Cork. Hackney coaches are not so called because they were first made in Hackney, London. The word comes from the French "Haquene," meaning an ambling horse. Brier pipes are not made from the roots of the sweet brier. The name is derived from the French "Bryere," meaning heath. Dark blue and light blue are not the colors of the Universities of Oxford and Cambridge respectively. A university has no colors. But members are entitled to wear the university badge. Dark blue and light blue are the colors of the athletic clubs of Oxford and Cambridge. A laughing jackass is not an animal; it is a bird. Cinderella did not wear a glass slipper. She wore a fur slipper, but the original French words were "Pantoufle en verre"; thus "fur" was changed to "glass."

By Ruth Rogers

LOVELY IN BETWEEN-SEASON WEAR SO YOUTHFULLY SMART AND SO SIMPLE TO MAKE

One of the new novelty rayon crepes in light evergreen coloring was chosen for this very smart looking dress. You will note its interesting collar. It is white bengaline silk.

The V-neck and centre-front skirt seaming are exceptionally alluring qualities, rendering this a model for normal or heavier figures.

One of the new heavy crepe silks, black crepe satin or crepe marocain can be used equally well. Light-weight wools are also suitable, particularly the new novelties with a glint or metal in its weave.

Style No. 552 is designed for sizes 16, 18 years, 36, 38, 40 and 42 inches bust. Size 36 requires 3 1/2 yards of 36-inch material with 1/2 yard of 36-inch contrasting, 2 1/2 yards of plating.

Price of pattern 20 cents in stamps or coin (coin is preferred). Wrap coin carefully.

Owing to heavy losses during storage and transit of Australian pearls to the United Kingdom, the Australian government has under consideration a plan to provide for the bringing of pearls on arrival in Great Britain. This would be a practice similar to that adopted for bananas which are shipped green and ripened on arrival.

Atlantic salmon, unlike those of the Pacific, do not die after spawning.

Christmas Seal Campaign

A.C.T. To Aid Saskatchewan Anti-Tuberculosis League In Worthy Effort

The Associated Canadian Travelers, with a membership of close to five hundred, and clubs in five of the leading cities of the province, have joined forces with the Christmas Seal Sale committee of the Saskatchewan Anti-Tuberculosis League and their entire membership for two months this fall will boost the sale of sheets of these cheerful little stickers, the revenue from which is accomplishing such gratifying results in the prevention of the spread of tuberculosis in Saskatchewan.

This alert organization, being desirous of associating itself with some humanitarian cause in which every member could actively participate, is determined to make this effort a real success. Its membership in five of the leading cities of the province have wholeheartedly signified their approval of the Christmas Seal Sale as a major activity, and on September 1st will initiate a campaign that is designed to enlist the support of the entire business community of the province.

While the generous manner in which wholesalers and retailers have supported the Christmas Seal Sale in the past is fully realized and appreciated, it is also felt that the response would be much greater if the purpose of the sale was fully understood and that a larger group of people would be reached by the sale of such as the Associated Canadian Travelers have volunteered to make. Personal contact means a great deal, and this will be provided by the A.C.T. members, each of whom will be supplied with a pamphlet giving full information regarding the work of the Saskatchewan Anti-Tuberculosis League and the all-important preventive work that is made possible by the sale of Christmas Seals.

The information contained in this pamphlet is of vital interest to every resident of Saskatchewan. Here are some of the facts in a nutshell: The tuberculosis death rate in Saskatchewan has been reduced 25 per cent. in the past four years.

The cost of treatment in Saskatchewan Sanatoria was over \$200,000 less in 1934 than in 1930.

The cost of treatment in Saskatchewan Sanatoria was over \$200,000 less in 1934 than in 1930.

The money raised by taxes for the maintenance of the three Saskatchewan Sanatoria is for treatment only; the money for preventive work is raised by the sale of Christmas Seals.

Prevention of tuberculosis and the protection of the well from infection is equally as important in the fight against tuberculosis as the care of those suffering from the disease.

During 1933 there were three hundred deaths from tuberculosis in Saskatchewan. During the past six years one-third of all deaths from infectious diseases in this province have been due to tuberculosis. It is now the most fatal of all infectious diseases.

The education of everyone regarding the control of tuberculosis. The provision of clinics for the examination of all persons having symptoms of tuberculosis, who are suspected by their family doctors of tuberculosis. Among 7,239 persons suspected and referred by physicians to clinics, sanatoria and sanatoriums during the past four years 898 active cases were discovered.

The sale of Christmas Seals is a beneficent which appeals to everyone who desires to support a humanitarian cause, and through the efforts of the members of the A.C.T. a great many more people will this year be afforded an opportunity of contributing thereto.

Survey Of Accidents

Record Shows 22 Is Dangerous Age

For Motor Driving

The dangerous age for automobile drivers is 22. This is the information contained in a statement issued by the governor's committee on street and highway safety following a three-year study of automobile accidents in Massachusetts.

"Of all operators licensed, approximately one-seventh are 22 years of age or under. Of operators involved in fatal accidents, about one-quarter are 22 or under," according to the highways committee's statement.

"In proportion to the smaller size of this group," the committee's statement reads, "its accident record is enough worse than the performance of the elder class to warrant special attention."

Were Good Spellers

Secretary And Teacher Defeated All Others In Match

A spelling bee was won in New York by two women who were victors in the annual Town Hall Club spelling bee. One, a private secretary, and the other, a school teacher, defeated a university professor, an editor, a foreign correspondent and a dozen others. They were Miss Lou Helmut, the teacher, who won the first of the two sections by spelling "polyphym" and "plagiarism," and Miss Edna Kelley, the private secretary, who won on "necrophagous."

LIGHT

By MANLEY F. MINER

Son Of Jack Miner, Canadian Naturalist

While walking quietly through an evergreen grove recently my attention was drawn to the fact that the trees had grown tall and rank, and as the soil was very rich in food for such trees they were very thick, all growing straight up for light. Each one trying to poke its head out above the other, but on close examination, all the lower limbs were dead while the tops of the trees were much alive. And what was the cause? On close investigation it was revealed

Yes, man might be alive bodily but he is completely dead spiritually, and unless he keeps in tune with the God, he is bound to die gradually, as the tree does, limb by limb as it misses the light.

After having this thought come to me, as I was alone with Nature, walking through this grove, I went home, and as I love to play my violin, picked it up, only to find it out of tune. Like all other string instruments they get quickly out of

Jack Miner and Rev. W. A. "Billy" Sunday, the Evangelist. Photo taken on a recent visit of the famed naturalist to Jack Miner's home.

that these limbs and lower branches were not getting light. Light that everything needs. Thus, without light these lower shoots from the trees were dying one by one because God's plan is that anything that lives must have light and heavenly food continually, or else they die and perish. And as I looked I thought of how this same example could apply to humanity. If we do not accept light and keep in tune with the infinite God, Nature, or whatever you have a mind to term it, we soon die.

tune by the action of the atmosphere. No matter how good your violin may be, it needs to be tuned every day and many times a day. The same can be said of man. The wear and tear of life and the demoralizing atmosphere he often comes in to which sin creates, so affects his disposition that he needs to be brought into harmony with God, in tune with God every day and many times a day.

Thus man cannot live on bread alone, he must have Light and be kept in tune with God between meals.

Luminous Human Body

Story Comes From Greece Of Strange Freak Of Nature

Another luminous human body engrossing scientific attention occupied columns in the Athenian press, recently.

Anastasis Economos, a mailman at Saloniki, is the subject of this second record discovery. In Italy recently a woman whose body was seen to give light while she slept was placed under observation in Rome. But she failed to respond.

Economos' body was said to give out sufficient rays to light a dark room.

Had Good Reason

"Yes, it is really remarkable," observed Clifford at the head of the table, "Clifford seems to eat twice as much chicken when we have visitors."

"Indeed!" exclaimed the lady visitor. "And, pray, why is that, Clifford?"

"Cause that's the only time we have it!" replied the truthful lad.

Sea Serpent Is Sighted

Commander Of French Liner Encounters Sea Monster In Azores

Commander Sylvestre, of the French liner Cuba, officially reported to his company that a sea-serpent had been sighted from the Cuba 800 miles southwest of the Azores.

A quartermaster and two sailors corroborated the statement. The monster was from 80 to 85 feet long, shaped like a huge lizard, with a long neck topped by a tiny head, and it had two humps on its back.

It was visible, Commander Sylvestre stated, for about 30 seconds making four leaps out of the water each time turning its head as though to view the ship.

Of late years in Scotland, the spread of bracken, particularly in the west, has reached such dimensions that it has become a serious menace to hill farming.

The grebe can fly through or under water as well as it can in the air.

Tarnish can be cleaned from copper and brass by using buttermilk.

SUNDAY SCHOOL LESSON

AUGUST 28

HOSEA PREACHES GOD'S LOVE

Golden Text: "For God so loved the world, that he gave his only begotten Son, that whosoever believeth on Him should not perish, but have eternal life." John 3:16.

Lesson: Hosea, Chapters 6, 11, 13.

Devotional Reading: Psalm 36: 5-10.

Explanations And Comments

Jehovah's Love for Israel, 11:1-4. "When Israel was a child," in the beginning of its natural existence, "then I loved him, and called my son out of Egypt." Called him, locally, into the land of Canaan, and morally, to set an example of true religion (Cheyne). "Hosea dwells on that beautiful past, half in melancholy reflection on the contrast, and half in persuasive pleading that the old relations between the nation and their God may be restored. The early days in Egypt and the Desert were a history of grace on the part of God. The prophet stops in his message of doom to recall lovingly the early periods of Israel's national existence, and sees God's love claiming them, and meeting with fit response" (Black).

The Prophet's Entreaty, 14:1-3. Hosea entreats the people of Israel to return to the Lord, and bids them offer this penitent prayer: "Take away all our iniquity and accept what in us is good; instead of burnt-offerings (bullocks) we offer thee our prayers (the offering of our lips). We will no longer trust in Assyria nor in Egypt, nor in idols, the work of our hands, but in thee alone, O Lord, our Father." (Cheyne).

Assurance of Divine Mercy and Loving-kindness, 14:4-8. To this penitent prayer the Lord will respond: "I will love them freely. See Hosea 6:1; Isaiah 51:18. Hosea is very sure that the mercy of the loving-kindness of God. If this rebellious countrymen will repent, they will be forgiven.

"I will be as the dew unto Israel." The dew is often used metaphorically for spiritual blessing. Dew falls on vegetation and revives it and causes it to grow; but it does not fall on barren rocks where it would be of no avail. The Lord is as the dew to human souls.

Western Musical Development

Easterners Has Kind Words To Say

Of Progress Made

Leo Smith, noted Canadian musician, who has just returned to Toronto from a Western Canadian tour, declared that "a visit to the west is an education." He said music endeavor in the west was already "productive of surprisingly good results."

"It's gratifying to note," he added "that the musical boundaries are not confined to the cities." He said while in Saskatchewan persons journey from far country points to attend the music examinations.

"The results seemed to show a keenness, vitality, even at times a spontaneity, which, to my way of thinking, rather overshadowed performance of corresponding grades in the east," Mr. Smith said.

Helen—Did you ever think seriously of marrying?

Tony—Of course I did. So I didn't!

The blood in a persons 80 years old has travelled about 5,000,000 miles.
